Project Management

Innovative Engineering

Transport & Logistics

Detailed planning ensures good performance

The harsh offshore environment requires precise planning, strong design and engineering know-how to produce robust and reliable equipment.

MENCK offers a full range of services around your hammer system and pile driving project to optimize installation efficiency.

Our service program goes above and beyond replacement parts and maintenance, offering complete care from pre-project consultation, specialized solutions and fleet management.

Our core philosophy is unprecedented customer service throughout the complete lifecycle of a pile driving project and hammer system, including:

- maintenance & repair
- upgrades
- spare parts
- on-site service technicians
- engineering services
- customer training
- fleet management

... and much more.

A large, complex steel structure, likely an offshore oil rig, is shown against a blue sky and ocean. The structure consists of numerous vertical and diagonal beams, creating a lattice-like framework. The top part of the image is partially obscured by a dark blue horizontal band containing text. The overall scene is industrial and maritime.

A Solid Foundation

*With a long history and proven experience,
MENCK stands for quality in offshore pile driving.*

Skilled personnel

Quality check system

Spare parts warehouse

- pile driving since 1868
- offshore pile driving since 1968
- highly-skilled service technicians
- dedicated project management
- specialized technical knowledge
- large spare parts warehouse
- around the clock availability
- mobile workshops
- lifecycle monitoring

MENCK stands strong on a worldwide support network of highly-skilled staff and partnerships with our suppliers.

We offer full service starting from driveability & stickup studies through to pile adaption, follower design and installation, ending with maintenance and repairs.

With our toll free number 00 800-ASK-MENCK, a service representative is available to you 24/7.

Mobilizing where you need us

A Competent Crew

*Electrical & mechanical engineering, project management,
maritime construction, training and experience.*

Dedication

Extensive training

Detailed planning

Communication is key to our success

We pride ourselves in the skill of our employees, who come from such diverse backgrounds as:

- maritime construction
- mechanical & hydraulic engineering
- software & hardware engineering
- complex system construction
- electrical engineering
- geology & geosciences – specifically subsea terrain

We have the technical know-how to design complex systems such as integrated in-hull power packs, deep-water pile driving components and customized solutions for your project.

MENCK service technicians are put through extensive in-house training and with our certification program you can trust that our people have extensive working knowledge to successfully and efficiently drive piles for your job.

Our competence in-house and in the field ensures unique and unbeatable service found no where else.

Complete Care

We are with you the whole way through; planning, design, installation, maintenance and more ...

Mobile workshop container

Secure transportation

MHC monitoring and control

You've purchased a hammer system, installed your piles and now what?

MENCK lifecycle and fleet management takes over the task of monitoring and taking care of your fleet. The MLM datalogger tracks all hammer activity, allowing for comprehensive analysis and detailed maintenance planning.

Fleet management ensures that your hammer system is ready for use when you need it. Tracking maintenance intervals, installation activity and down time, MENCK provides detailed plans on maintaining your fleet so that it is always ready for use.

We cover the whole scope of your hammer system, from managing downtime to performing maintenance and mobilization for your project. Your only worry is to let us know when your projects are approaching.

MENCK's service plans ensure you are covered for the life of the hammer system.

Dedicated spirit

Experience You Can Trust

140 years and counting – experience,
excellence & quality.

Offshore pile driving experts

We know offshore pile driving!

MENCK has a rich history in construction and pile driving dating back to 1868. Since the 1960's we have specialized in offshore pile driving, making the sea our home.

The MENCK name is known for quality, ruggedness and reliability.

We have driven every type of piled foundation, from monopiles to jackets as well as conductors and specialized anchors, in thousands of pile installation jobs.

Our experience, skilled staff and expertise enables us to develop creative solutions for your piling project.

We're here to help you.
