

## Lateral FlexiCal

- A versatile calliper with interchangeable blades for specific geometries.
- Accurate and repeatable linear measurements. ( $\pm 0,1\text{mm}$ )
- Real-time measurement and auto-generated log-file.
- No post processing.
- Simple ROV integration and intuitive user interface means measurements can be taken within minutes of arriving on site.
- Quantify dimensions quickly and accurately with ease.
- Delivered with positioning bars to ensure correct tool orientation when measuring non-flat geometries. (mooring chain etc.)

<b>Interface Requirements</b>	24VDC & RS232
<b>Depth Rating</b>	6000m
<b>Accuracy</b>	$\pm 0,1\text{mm}$
<b>Standard Measurement Range*</b>	60mm -430mm*

\*Also available with extensions and user specific blades to accommodate specific dimensions and surfaces.
