

The Specialist Offshore Services Fluid Injection system pressure skid, has 3 main parts within a lightweight aluminium frame.

- 1) 3 Stage Pressure controlled HP Pump - Allows selection of 3 different pressures in the pump range.
- 2) Hot stab control panel - Allows the user to set a hot stab so that the ports can be either blocked, pressured, or set as pressure and return.
- 3) 2 x 32 Litre Bladders (Can be supplied with Bladders or Spring Compensators, various volumes available)

### Tool Specifications

- ⇒ Hydraulic Input 180-210bar, 50LPM
- ⇒ Output 0.5-420bar (6000psi), Flow 20LPM
- ⇒ 3 Stage Manifold with pilot operated valves to select different pressures.
- ⇒ Flow adjustable from 20-50LPM
- ⇒ Integral relief valve 0.5-240bar
- ⇒ Operational hoses supplied
- ⇒ Choice of T-bar, Multi, or Fish Tail handle
- ⇒ Can supply various sized bladders to suit, please enquire
- ⇒ Can be used to pump other fluids such as Hydraulic Oil and Glycol
