

The Specialist Offshore Services 220Bar IHPU / Fluid Injection system is a compact and integrated all-in-one unit based on the reliable and highly regarded Dynaset HPW pump. No other system offers the same power and reliability.

Simple to interface with incorporated custom drive manifold means that the unit can be used on a wider range of ROV's, as it allows the user to limit pressures and flows depending on the customers hydraulic supply abilities. Unit is supplied complete with hydraulic hoses.

Features

- ⇒ Hydraulic Input 180-210Bar, 70LPM
- ⇒ Output 0.5-220Bar, Flow 50 LPM
- ⇒ Flow adjustable from 20-50LPM
- ⇒ Integral relief valve 0.5-220Bar
- ⇒ Hydraulic Pressure No.8 JIC and Return No.12 JIC, Pilot No.4 JIC
- ⇒ Fluid Output pressure No.6 JIC and Suction input No.12 JIC
- ⇒ Operational hoses supplied
- ⇒ Can supply various sized bladders to suit, please enquire
- ⇒ Can be used to pump other fluids, such as hydraulic oil, Glycol, Methanol.
- ⇒ Measures 500mm x 300mm x 210mm, 32kg in air
